CHECKLIST FOR CONDUCTING A FAIR USE ANALYSIS BEFORE USING COPYRIGHTED MATERIALS

This checklist is a tool to assist you in applying the balancing test for determining whether you may make or distribute copies of works protected by copyright without having to obtain the permission of the copyright holder.¹ It is recommended that you complete and retain a copy of this form in connection with each "fair use" of a copyrighted work.

¹In many cases, the University Library may have a license to use material. A fair use analysis does not have to be conducted where the desired use is permitted under the terms of an applicable license. Similarly, other provisions of the copyright law cover such matters as library copying, in-class use, and distance learning. This checklist is not needed where other specific statutory provisions authorize the activity.
